

Finest Nano-Technology

Nano-Technology is the key technology of the 21st century and will influence our life in the long term.

Nano-Technology works on structure elements up to 10.000 times thinner than the human hair. By selective adjustment of those "nano-particles" to the different surfaces dirt and contaminations will lastingly not be found anymore.

Water and dirt simply pearls-off

The NewProNano-particles tie together with the underground in a molecular way. The water pearls-off "like a flash" from the improved surface and, therefore, provides an invisible water-protection, in- and outside.

NewProNano was developed and patented in Germany and is produced for NewPro in one of the most modern production plants.

Already today, you should profit from the multi-functional properties of this future-oriented technology.

Nanotechnologie,

> for every kind of surfaces <

... because we are better

NewPro Nano Universal

Product description:

NewProNano Universal is a multi-functional, invisible impregnating agent for all kinds of surfaces of porous materials.

NewProNano Universal is free of silicon, wax and oil. The breathing activity is not impaired, not even after multiple application.

Once sprayed **NewProNano Universal** develops full effect. No cover work is required.

Application areas:

- untreated wood
- terracotta, clay
- mineral areas
- joint tile pavements
- natural stones, marble
- fiber cement
- bricks
- sandstone, gas concrete
- clinker brick, facing brick
- exposed aggregate concrete, concrete stones
- tile, stone plates

NewProNano Textile+Leather

Product description:

NewProNano Textile + Leather is a layerless impregnation for all kind of textiles. The layerless TC-Nano[®]-particles let water simply pearl- off from the surface.

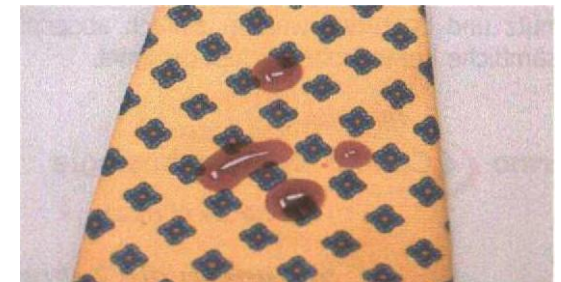

The breathing activity of **NewProNano Textile + Leather** remains entirely unchanged.

Important:

The original nano-elements of **NewProNano Textile + Leather** are not rinsed out by rain water.

Application areas:

- Suede
- leather
- cotton
- rainwear
- hiking outfit
- hunting clothes
- awnings
- parasols
- every kinds of tents
- rucksacks
- ski clothes
- hats, caps

... and further NP Nano-products:

NewPro Car-Glas

The ultimate clear-view-nano-impregnation lets the water pearl off "like a flash" from the windscreens - at approx. 80 km/h the use of windscreen wipers is no longer necessary. Frozen screens can easily be cleared by only one single wiper movement without any annoying scratching.

NewPro High-grade steel "Anti-Fingerprint"

High-grade steel surfaces are very sensitive to dirt and require daily care. Stop it !! With TC-Nano high-grade steel dirt, fingerprints, grease and bacteria do not have a chance anymore. Door handles, handrails, sink units, remain permanently perfect.

NewPro Ceramic

The Anti dirt impregnation for basin, shower, bathtub, bidet, toilet. Water pearls-off immediately. No more spots of lime, tooth paste, cream, soap, urine and dirt. Dirt and bacteria are simply rinsed off. Suitable for all ceramic surfaces.
