

Product Data Sheet

NewPro Cleaner PLUS

Product Description

NewPro Cleaner Plus was developed to remove strong / persistent soiling. Due to its novel properties the cleaner penetrates into the smallest micro-pores.

Application area:

persistent soiling like particulate matter, adhesive residues, thin paint films, felt pens, mineral deposits, abrasion striation, grease, oil, etc.

Sub-surfaces:

tiles, fine matte, natural stone, terracotta, plaster, concrete, linoleum, and various plastics.

Consumption:

0.05-0.2 l/m² depending on sub-surface and soiling.

NewPro Cleaner ingredients are renewable raw materials; it is phosphate and chlorine free, bio-degradable with the addition of water.

Application

NewPro Cleaner PLUS should be applied directly and undilutedly, light brushing enhances the effectivity. Brush area after 5 to 10 minutes residence time. Sparing addition of water will improve effect considerably. Finally rinse treated sub-surface with water.

For most applications it will be sufficient to apply NewPro Cleaner PLUS lightly. Spray product or disperse after effusion with dry cloth (sponge, brush).

Advice:

Dilution with water will diminish the high performance of NewPro Cleaner PLUS considerably. NewPro Cleaner PLUS then acts like a usual detergent.

Xi:

Ensure good ventilation when used in closed spaces. Avoid contact with eyes. We recommend wearing goggles and protective clothing. In case of eye contact, rinse thoroughly with running water for several minutes. Contact ophthalmologist.
