

## Product Data Sheet

### NewPro Headstone Cleaner Plus

#### Product description

NewPro Headstone Cleaner Plus is a liquid, surface active headstone cleaner with disinfectant agents and pure alcohol as well as grease and oil dissolving agents.

NewPro Headstone Cleaner Plus works against grease, lime, rust, algae, moos deposits, iron, manganese, grime, urin scale.

NewPro Headstone Cleaner Plus is biodegradable.

NewPro Headstone Cleaner Plus is bactericidal and fungicidal, so that bacteria and fungus are killed in a short time. The longer the reaction time, the better to remove the crusts.

#### Consistence

NewPro Headstone Cleaner Plus is a concentrate containing anorganic acids, nonionic and cationic tensides.

#### Application areas

NewPro Headstone Cleaner Plus is used for basic and maintenance cleaning of headstones of travertine, marble, natural stone, quarystone, etc. It removes persistent residue and soiling.

#### Application

NewPro Headstone Cleaner Plus must always be diluted with water. Depending on the age and thickness of the soiling/residue, apply with a dilution between 1:5 and 1:50 using high-pressure sprayer, pressure pump vaporizer, rubber mop, sponge, high-pressure cleaner, etc. and let react between 1 to 10 minutes. Rinse off with plenty of water. Marble and travertin must only be treated with a dilution of 1:25, and a reaction time of 3 minutes maximum, and rinse off thoroughly with water.

Light metals, chromed and zinc coated parts must be treated with a dilution of 1:20 and a reaction time of 3 minutes.

#### Packaging Size

- 1000 ml Flasche bottles
- 10 kg Kanister cans
- 30 kg Kanister cans
