

Product Data Sheet

NewPro-Active Cleaner

Description

NewPro-Active Cleaner is an environmentally safe cleaner specially designed for the thorough cleaning of glass and glazed ceramic as well as the effective and long-lasting removal of calc and urine stains and even works to fight bacteria.

Range of Application and Use

NewPro-Active Cleaner was specially designed and developed for application to a wide range and variety of different surfaces such as:

- Baths
- Glass
- Glazed ceramics
- Nano-coated surfaces
- Showers and toilets.

For the cleaning of marble and other acid-sensitive surfaces, NewPro offers an alternative cleaner.

Product Characteristics/Features

NewPro-Active Cleaner exhibits the following product characteristics:

- Easy removal of calc and urine stains
- Environmentally safe
- Fights bacteria and acts as a deodorant
- Odorless
- Very effective and offers the fast and easy removal of dirt and grime deposits.

Instruction for Application and Use

Surface Preparation:

All surfaces should be free of grease, oil, dirt and dust, dry and sustainable.

1. As usual, thoroughly remove all large dirt and grime and loose particles.
In the event of extreme dirt or grime, repeat this step until the particles and grime is removed.

Application:

NewPro-Active Cleaner develops its full cleaner power when mixed with water. Therefore, NewPro-Active Cleaner should not be applied undiluted

1. NewPro-Active Cleaner –Concentrate diluted at a ratio of 3:1 (3 parts cleaner concentrate and 1 part fresh warm water)
2. Clean surface with non-abrasive combo-sponge (use white side).

Instruction for Application and Use

Application:

3. Allow NewPro-Active Cleaner to actively take effect and after a short time, rinse off dirt and grime particles with lots of fresh water
4. Remove the remaining moisture and polish the surface dry.

Warning:

Do not allow NewPro-Active Cleaner to dry onto the surfaces which are to be cleaned.

Notice:

NewPro-Active Cleaner covers a wide range of surfaces. It is, therefore, recommended a test is carried out to the surface to determine the durability and suitability of the product for its intended purpose or surface. NewPro-Active Cleaner is not designed for use on marble and other acid-sensitive surfaces.

Machine Application:

NewPro-Active Cleaner can be applied using a standard airless spraying device. Pay careful attention to the manufacturer's operation manual for the spraying device as well as the mixing instructions.

Mixing Instructions:

NewPro-Active Cleaner can be diluted at a ratio of 3:1 (3 parts NewPro-Active Cleaner – Concentrate and 1 part fresh warm water).

Use/Product Consumption:

- An exact amount of required material can be determined with a test application.

Required Conditions for Use/Application

Application and drying can be carried out with a surface and area temperature between a min. +10°C and max. +30°C.

Required Time to Take Effect:

- Dependent upon the degree of dirt and grime.

Warning:

Do not allow NewPro-Active Cleaner dry onto the surfaces which are to be cleaned.

Cleaning of Tools:

- Immediately after use, clean tools with lots of clean water.
