

Product Data Sheet

NewPro-FS 10 Calk Protection System - As Urine Killer

Product Description

Sacrificial layer to protect calk against the permeation of dirt, grime, water and urine.

Range of Application and Use /Appropriate Surfaces

NewPro-FS 10 can be applied as a protective film on calk areas such as (temporary removable layer) bathroom floors, urinals, shower stalls, etc.

Product Characteristics/Properties

NewPro-FS 10 is a protective layer for calk based on water vapors permeable micro waxes and silicone. Liquids, dirt and grime cannot permeate the calk.

Further properties include:

- Dries quickly
- Easy to apply
- Fire damp resistant
- UV-stabile
- Water repellent (protects surfaces against moisture)
- Weather resistant.

Technical Data

Adhesive basis:

- Micro wax, silicone.

Specific weight:

- Approximately 1 g/cm³.

Instruction for Application and Use

Surface Preparation:

All surfaces must be sustainable, clean and free from loose particles or particles which can compromise adhesion such as grease, as the corresponding area of application or surface requires.

Application/Use:

NewPro-FS 10 Calk Protection System is applied to the appropriate surface by pouring or venting. Two evenly covering layers/coatings are required.

Instruction for Application and Use

Use:

An exact amount of required material for the intended purpose is to be determined with a test application to the surface of the object.

Required Conditions for Use/Application

The application can be effectuated with a surface and area temperature between a min. +8°C and max. +30°C

During drying periods, protect the coated surface from water.

Drying Times:

- At approximately +20°C and 80% Humidity
- Second coating exterior after approximately 1 hour
- Second coating interior after approximately 15 – 20 minutes.

Depending upon the thickness of the layer.

Cleaning of Tools:

- Clean with clean water immediately after use.

Delivery Form

Units Per Package:

- Units Per Package S with 10 x 1 Liter.

Color:

- Milky, colorless when dry.

Further Instructions

Transport:

- Product is unlabeled and is non-hazardous.
- Do not inhale atomized spray of product.

Storage:

- Can be stored when cool, frost-free in the original closed packaging for approximately 1 year.

Safety and Protective Measures

The general protective measures for water-soluble materials are to be taken.

The technical advice regarding the use and application of our products is the result of extensive research and development as well as many years of experience, according to the best of our knowledge. The different kinds of requirements of an object, under varying conditions, make it necessary for the user to check the suitability for the intended purpose. We reserve the right to effectuate changes, which serve to affect the technical advance or improvement of our product.

For further instructions, please refer to the product safety data sheets for this product.
