

Product Data Sheet

NewPro Stone Soap Terrazzo WP 2

Product Description

WP 2 Stone Soap is a maintenance concentrate for the cleaning, impregnation and care of terrazzo and other synthetic stone floors.

WP-2 Stone Soap is a unique mixture of natural fatty acids which react with calcium carbonate. Calcium carbonate is contained in most stone floors and together with the contained high quality impregnation agent; WP 2 Stone Soap forms a wafer-thin water resistant and dirt repellent film.

WP 2 Stone Soap is diluted for regular cleaning at 1:100 with water and the floor is then wiped with this solution.

Do not wipe over with clear water.

Content Materials according to EU-Recommendations:

Over 30% Soap; auxiliary agents and scents.

The product is biodegradable.

Packing:

UBA: 31100004

Contents: 1 Litre
