

## Product Data Sheet

### NewPro Micro Fiber blue

#### Description

NewPro Micro Fiber blue/heavy cloth used for sensitive car paint as well as car glass, recommended by the automobile industry.

This blue NewPro Micro Fiber Cloth was developed for the automobile industry and released after laboratory tests. It is a new type of Micro Fiber Cloth for very sensitive car paints. It is ultrasonic cut and has two different sides. The first side is meshes knit with short fibers allowing scratch and lint-free application. The second side has meshes knit with long fibers allowing a strong capillary action emphasized by the fineness and multiplicity of fiber film elements. Thereby enhancing the absorptive capacity of the NewPro Micro Fiber Cloth. This NewPro Micro Fiber Cloth is unbelievably soft and thick making it well suited for drying (removing) polishing agents, wax, etc.

#### Weight

- 400g/sqm, Size 42 x 38 cm
