

Product Data Sheet

NewPro GreenEx Magic – The „Magic“ Roof, Facade and Wall Cleaner

Produced from sustainable raw materials with anti-bacterial effect

Your facade or your roof is attacked by moss, black algae, or lichen and there is no solution in sight? Then this verifiably effective product will help you – with this product we clean almost all kinds of roofs and facades. Extreme moss (several centimeters thick, moss cushions) are best removed manually upfront.

Fouling can affect these rooftops:

House roof, porch roof, garage roof, stepped roof, folding roof, flat roof, pitched roof, mono-pitch roof, saddleback roof, pavilion roof, pyramidal broach roof, and glass roof.

Lichen, algae can these types of facades:

House facades, church facades, high-rise facades, industrial building facades, lamella facades, perforated facades, blind wall facades, media facades, glass facades, wood facades (and –fences), natural stone facades

Roof cleaning with our product is 100% environmentally friendly, because the concentrate for facade cleaning is made from sustainable raw materials.

Examples

Paving after 3 months

Facade before and after

Center roof treated;
result after 2 months

paving treated
and untreated

In nature, algae and lichen belong to the natural biota, but if they are close to homes, they are often irritating and unaesthetic and can strongly impair the appearance of a home.

NewPro GreenEX Magic removes fouling from:

Washed concrete slabs, house walls, roofs, natural stone panels, concrete topping, plaster, swimming pools, stairs, tombstones (tombstone maintenance), stone figures/stone casting figures, wood/wood coverings, terraces/terrace roofs, garden paths, balconies, paved streets/paths, sidewalks, gateways, garage entrances, carports, parking spaces, automatically.

This is our product information summarized:

The advantages of our product are:

- Made of sustainable raw materials – environmentally friendly
- Cleaning without high pressure cleaner
- No final rinse
- No scrubbing off for at least 1 year!

Cleaning of washed concrete slabs, wood, roof tiles, facades, monuments, tombstones, swimming pools, awnings, flower pots, natural stone, plastic, removal of algae in sanitary areas

Quart is a very light disinfectant substance, which once applied lightly disinfects surfaces for 15-18 months and thus kills micro-organisms. After a few days the dead micro-organisms decompose and the surface (no matter which material) becomes cleaner and cleaner. The surface thus cleans itself, scrubbing and rinsing with high pressure cleaners becomes obsolete. The active components which remain on the surface when applied as intended (long term protection) are absolutely safe regarding the material from early on.

The product are well tolerated by plants which results in many great application opportunities around your home.

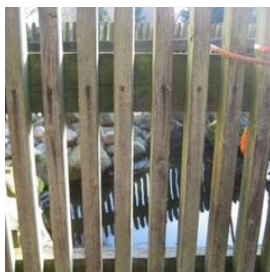

Application:

1 liter concentrate is diluted with 8 liters of water

3 liter concentrate mixed with 25 liters of water is sufficient for an area of 100 m²

fence before

fence after

fountain before

after 10 days

Self-cleaning through product and rain.
