

Product Data Sheet

NewPro Synthetics and Cushion Cleaner Z Blue as Concentrate

Product Description

NewPro Synthetics and Cushion Cleaner Blue is a high concentrated, ecologically friendly special cleaner for utility vehicles, tarpaulins, boats, motors, workshops, garages, and floors. NewPro Synthetics and Cushion Cleaner Blue dissolves Oil, grease, grime, and other persistent soiling. NewPro Synthetics and Cushion Cleaner can be used for manual cleaning as well as in cleaning machines and high-pressure cleaners. NewPro Synthetics and Cushion Cleaner is a special cleaner for all products made of coated and uncoated synthetics with the following properties:

- free of tensides
- removes grime and atmospheric deposits from surfaces
- ecologically friendly
- multi-functional, because it cleans, dissolves, emulsifies and removes lime molecules

Advantages

Old, dried up dirt often contains grease, lime deposits or other debris making it a hard, almost insoluble coating. Applying the cleaner is an excellent choice when increasing the dosage. If necessary we advise to use NewPro Grease Remover for pre-cleaning.

Application

NewPro Synthetics and Cushion Cleaner Blue is specifically usable for:

Spot Removal

Apply NewPro Synthetics and Cushion Cleaner Blue undiluted and rub in lightly. Let react for approx. 5 minutes and then rinse off as usual.

Kitchen: For cabinets and counter tops mix five caps of cleaner with 1 liter of water. In case of strong oil pollution dilute at a ratio 1:3 max., spray on, let react and wipe off using a moist cloth. If the cleaner is used in higher concentration, rinse off with plenty of water.

Furniture: Synthetics, aluminum, artificial leather, vinyl etc. mix 3 caps of cleaner with 1 liter of water

Car, Boat, Airplane, RV: Mix 3-5 caps of cleaner with 1 liter of water

Garden Furniture: Excellent cleaning properties on synthetics

Window Frames and Roller Shutters, Blinds, Window Sills: Depending on the degree of soiling, mix 3-6 caps of cleaner with 1 liter of water

Motors and Chassis: Apply NewPro Synthetics and Cushion Cleaner undiluted, hose off after a short reaction time. It works like an alkaline cleaner (ph-value 10.2) with corrosion and maintenance protection. A special high-quality tenside combination offers more cleaning power against persistent soiling, especially soiling stemming from oil, grease, and grime.

NewPro Synthetics and Cushion Cleaner may be applied to PVC, polycarbonate, acrylic, vinyl, and other synthetic compounds found in the home.

Properties

- Skin and environmentally compatible

Dosage

- Depending on the degree of soiling, NewPro Synthetics and Cushion Cleaner can be diluted with water in a ratio of 1:3 up to 1:40.

High-Pressure Cleaning (High Pressure Cleaning Machine)

- For on-going cleaning using a high pressure cleaner, a 1 – 2% solution is sufficient.

Storage

- In closed containers up to 3 years

Safety Advice

See Material Safety Data Sheet for details concerning hazardous materials.
