

Product Data Sheet

NewPro Alkaline Shadow Remover

Description

NewPro Alkaline Shadow Remover is a highly effective, semifluid/viscous shadow remover based on ethanol.

Application

Product is designed to remove very persistent shadows from almost all subsurface, (i.e. concrete, brick and plaster). NewPro Alkaline Shadow Remover is not applicable to aluminium surfaces (it is advised to use the NewPro Eco remover). Please take into account that façade paint could be affected. Before application, please test at an inconspicuous area.

Handling Instructions

Spray on NewPro Alkaline Shadow Remover or apply with brush. If necessary work product thoroughly into the shadow. Leave to / let react for approx. 10-30 minutes, until the paint dissolves.
