Ecological High Power Cleaner Formula OX

NewPro Ecological High Power Cleaner Formula OX was developed specially to remove soiling from marble. Due to the innovative working principle the cleaner enters into the finest micro pores.

Application Area:

persistent soiling like fine dust, adhesive remains, thin paint films, felt pens, inorganic deposits, abrasion stripes, grease, oil, etc.

Surfaces:

marble, sensitive stone floors, also tiles, finestone, natural stone, terracotta, plaster, concrete, linoleum and various synthetic products.

Consumption:

1 – 3 ml/l water depending on surface and soiling

NewPro Ecological High Power Cleaner Formula OX contains ingredients of renewable raw materials, it is free of phosphate and chlorine, it is biodegradable up to 100% according to OECD regulations.

Application:

Apply NewPro Ecological High Power Cleaner Formula OX diluted with water, for extreme soiling apply directly and undiluted, light brushing increases the effect. After a short soaking time of approximately 5 to 10 minutes, rinse off surface. Subsequently, the surface should be rinsed again with water.

For most applications it is sufficient to spread and wipe NewPro Ecological High Power Cleaner Formula OX with the cleaning water. Automated cleaning should also be possible with product.

Advice:

The product is 100% biodegradable and does not contain any preservative parts. The diluted cleaning solution cannot be preserved, after the work is finished, product should be disposed in the sewer. Clean machinery used with product to prevent odours.

Product is suitable for marble surfaces, but before extensive use, test product on a small testing area. Odourous cleaning water should not be used anymore. Smelling can occur because product contains renewable raw materials without conservation to achieve 100% biodegradability.
