

Product Data Sheet

Basic Cleaner especially for Non-Ferrous Metals

Application Area:

Cleaning of transporters, truck chassis, PVC tarpaulins, as well as all non-ferrous metals, ovens, grills, etc..

Effect:

NewPro Basic Cleaner removes persistent and tight residue of oil, dust, abrasive dust, oxides and other adhesions caused by abrasion. It protects varnish and anodization and emphasizes the original coloring. Composition: It contains organic and inorganic acids, wetting agent, 5-15 % nonionic tensides and an antistatic agent.

Application:

NewPro Basic Cleaner is a cleaner concentrate which always has to be diluted with water. Depending on the degree of soiling use hot water with a dilution ratio of up to 1:10 for manual cleaning or spraying devices, for steam cleaners and washing bays 10-15%, ultra-sound devices 2-10 % (1-5 min.).
