

Product Data Sheet

NewPro Hybrid Varnish New

The product is scratch-resistant. It can be removed only mechanically. It stays there almost forever.

Product Description

NewPro Hybrid Varnish is a product with long-term effect. The product is water-repellent, acid-resistant and prevents adhesion of contaminants to the surface, it is conditionally scratch-proof (easy-to-clean effect). Due to the hydrophobizing effect, water and oil roll off the treated surface reducing the chance of re-soiling.

Application Areas:

Metal, Plastics, Ceramics, Stone

NewPro Hybrid Varnish protects the treated surface areas against re-soiling, e.g. oil, grease, acid, atmospheric soiling as well as tiny dirt particles. Dirty water can no longer settle in the matrix (structure). The coating is permanent. NewPro Hybrid Varnish has a long-term effect and is UV resistant. NewPro Hybrid Varnish cannot be removed with water, alkaline or acid cleaners. Our product guarantees that the visual appearance of the original surfaces remains unchanged. Surfaces which have been treated with NewPro Hybrid Varnish are easy to clean, in addition, cleaning intervals can be extended considerably.

Application:

NewPro Hybrid Varnish is sprayed onto clean and grease-free surface. There are various application methods

Curing Time:

The best effect is achieved after about 72 hours curing time. Warming can reduce the curing time considerably.

Consumption:

1 liter per 50 m²

Care Instructions:

NewPro protected surfaces are cleaned using a sponge and NewPro Electrolyte Cleaner.

Storage:

10 months not below +4°C

Disposal:

Return container to collection center. Dried product remains can be disposed with household garbage.

Work Hygiene

When using chemicals, the safety precaution measure according to the EU safety data sheets are to be observed. The appropriate protective clothing, protective gloves as well as protective goggles and facial protection are to be worn at all times when handling the product.
