

Product Data Sheet

NewPro Polishing Cream PLUS

Description

Newpro Polishing Cream Plus with highly effective ceramic Nano particles removes without effort:

- Calcification
- Corrosion
- Metallic oxide

Productlabel

Dirt deposits as well as coatings and coating residues without impacting the surface. NewPro Polishing Cream Plus is especially suited for glass fiber surfaces like Solar panels, car glass, shower walls which can subsequently be protected with NewPro surface protection.

Application: Shake well before application

Apply using wet 3M pad or sponge (white side) on surface and polish in circular motion. Depending on degree of soiling add product or water. Subsequently wash surface with sufficient water and dry well.

Conduct NewPro coating according to application instruction. Use sparingly for cleaning uncoated surfaces.

Especially suited for ceran stove tops.
