

Product Data Sheet

NewPro Lawn Making Color for Artificial Turf

General Information

Usage: High coverage marking colour for marking artificial turf using a lawn marking machine like e.g. ProLine, EasyLiner, Line Car, Ecomatic, Supermatic or a similar one.

The concentrate excels at very quick drying properties, excellent adhesion characteristics as well as very good weather resistance and elasticity.

Basis: Titanium dioxide, natural fillers, aqueous polyurethane dispersion.

Physical properties

Colour: white, other colours on request

Gloss level: matt

Density: 1.35 g/cm³

Consumption: For one football pitch: 4 to 6 ltr of concentrate depending on the mixing ratio.

Application

Area of application: artificial turf

Application: After dilution applicable with suitable spraying equipment.

Thinning: With water. It is preferable to use middle soft water, as it has a positive effect on stability and spraying. Mixing ratio: 1:0.5 to 1:3.

Processing equipment: Conventional lawn marking machines. Please stir up well before use!

Processing temperature: Dry and frost-free weather conditions.

Clean-Up: Immediately in the wet state with water, if necessary in addition with a household detergent.

Consignment & Storage

- Packaging: Plastic canister with 15 kg content
- Storage: Keep dry and cool, but frost free! The product can be stored for a minimum of 9 months when kept sealed in the original container. Once the container is opened or diluted, use it soon and keep it tightly closed for storage.
- Disposal: Completely emptied containers can be recycled. Containers with hardened remains are residual waste. Containers with liquid remains are special waste and should be disposed at special collecting points according to the locally valid laws on waste disposal. You will find further information regarding the correct disposal on our MSDS

Hazardous warning

No labelling required as product is non-hazardous. Please also follow the instructions on the MSDS.
